I declare that the information I have given is correct and complete,

and face prosecution if I give false information. DD MM YYYY

The preference model is defined as follows for each pair.

p (y1 | x) = sum(k) exp(r) / Z
D = {x, yw, yl} for i = 1 to N

The function below prints a greeting for the given name.

```
def greet(name):
    return 'Hello, ' + name
```
