Our financial focus is on long-term, sustainable growth in free cash flows. Free cash flows are driven primarily by increasing operating income and efficiently managing accounts receivable, inventory, accounts payable, and cash capital expenditures, including our decision to purchase or lease property.

Free cash flow is cash flow from operations reduced by purchases of property and equipment, net of proceeds from sales and incentives. The following is a reconciliation of free cash flow to the most comparable GAAP cash flow measure, net cash provided by operating activities (in millions):

Net cash provided by (used in) operating activities	$	46,752	$	84,946
Purchases of property and equipment		(58,321)		(48,133)
Acquisitions, net of cash acquired				(5,839)
Free cash flow	$	(11,569)	$	36,813
Net cash provided by (used in) investing activities	$	(37,601)	$	(49,833)
Net cash provided by (used in) financing activities	$	9,718	$	(15,879)

Free cash flow improved because operating cash flow grew faster than purchases of property and equipment, which were lower than in the prior year as spending on fulfillment capacity slowed.

Our principal sources of liquidity are cash flows generated from operations and our cash, cash equivalents, and marketable securities balances, which were higher at the end of the year than at its start. Amounts held in foreign currencies were also higher than in the prior year.
